

(a) lattice, motion, refuges

$$W_i(y) \propto (1 + \alpha A_i(y)) e^{-\kappa(1-s_i)^{p_{n_y}}} [1 + \pi(1 - b_i)^q]$$

- socialized, $s \geq 0.2$
- deteriorated, crowded
- deteriorated, isolated

(b) social state over a life (illustrative)

(c) expected for C0 (no refuges)
