

(a) background mortality

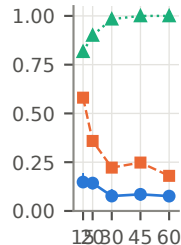

(b) variants and initial condition

single-pass refuge admission
 $\mu_{bg} = 0.003$
 $\mu_{bg} = 0.008$
 nest period 3 wk
 asynchronous update
 async., soft capacity
 pups born at $s = 0.25$
 pups born at $s = 0.5$
 initial ages $U\{4..52\}$
 initial ages $U\{4..80\}$

(c) system size

background mortality μ_{bg} (10^{-3} per week)

—○— C1, preregistered evaluator —●— C1, primary
 —□— C1', preregistered evaluator —■— C1', primary

O17p (95% Wilson CI; $n = 200$)

○ C1, preregistered evaluator ● C1, primary
 □ C1', preregistered evaluator ■ C1', primary

lattice side L (density $N_0/L^2 = 0.44$)
